License for Dr.Web for Windows Mobile for free!

Cures viruses	Improved technologies
<p>Operation in an infected system and exceptional resistance to viruses make Dr.Web a stand-out among anti-viruses.</p> <p>Industry pacesetter! Dr.Web has the highest success rate of curing active infections.</p> <p>Dr.Web can be installed in an infected system without any preliminary curing.</p> <p>Dr.Web anti-virus provides multi-level protection of RAM, hard disks and removable devices against viruses, rootkits, Trojans, spyware, adware, hack tools and other malicious programs.</p>	<p>Improved! Scanning speed of Dr.Web has increased by 30% compared with the previous version.</p> <p>New! Dr.Web SelfPROtect makes the anti-virus immune to any attempts of malicious programs to disrupt its operation.</p> <p>Improved! Dr.Web Shield™ protects a system against viruses featuring rootkit technologies.</p> <p>Improved! Origins Tracing™ is a unique non-signature detection technology that allows Dr.Web to detect unknown threats.</p>
Reliable protection of e-mail	Efficient anti-spam
<p>SpIDer Mail® performs a virus scan of all components of a message including archived attachments before it gets into a mailbox.</p>	<p>Work of Dr.Web anti-spam doesn't depend on the language of a message and guarantees a high rate of detection with cases of false detection reaching zero.</p>
Shield from Internet threats and fraud	Parental control and protection against unauthorized access
<p>New! SpIDer Gate™ blocks web-pages containing malicious code loaded by any browser and protects against phishing and fraudulent Internet resource. You receive web-content cleaned of malicious code.</p>	<p>New! Dr.Web Parental Control will protect your children against visiting web-sites you consider unwanted and contacting criminals. Block access to USB and network devices and specified files and folders to secure your data from an occasional deletion or unauthorized access.</p>

Doctor Web

Doctor Web is the Russian IT security software vendor. Dr.Web anti-virus products have been developed since 1992.
