Dr.WEB®

since 1992

Looking for an anti-virus?

Sign up for Dr.Web with your service provider!

The Dr.Web Anti-virus service — an innovative model whereby an anti-virus is offered as an online subscription service.

For home and business

For any device

For any term length, starting from 1 day

Security expenses are flexibly managed and controlled

Managing the Dr.Web Anti-virus service is easy. Just go into your personal subscriber area at any time to activate a subscription, suspend a subscription (for the duration of a vacation or business trip), expand your Dr.Web protection to include additional PCs/Macs and mobile devices or decrease the quantity of subscriptions you have, and renew services. You can also switch packages and get information about how Dr.Web works.

- Sign up for the Dr.Web Anti-virus service **in just a few minutes** — compared with getting infected, signing up is easy and trouble-free!
- Subscribe and pay for **any period, starting from 1 day**.
- Subscriptions have no end limits—essentially, this is a "**forever anti-virus**".

Sign up now — It's quick!

- **Subscriptions are active immediately after connecting** — serial number activation is not required.
- **Service activation takes only a few minutes** — select a subscription package, specify the number of computers to be protected with Dr.Web and the subscription period, accept the license agreement, and you're DONE!

Install Dr.Web software — It's easy!

To launch Dr.Web protection, specify the operating system you use, receive a link to the installer, and install Dr.Web.

If Dr.Web Security Space or Dr.Web Anti-virus for Windows (not a service) is already installed on your computer, you can easily configure it as a service without reinstalling the program.

Your computer will be protected even when it's not connected to the Internet!

The software won't receive updates but all the components that protect the hard drives, removable media, and e-mail will remain operational.

IMPORTANT! The Internet is not the only source of malware that can infiltrate your computer. That's why you need to regularly update the installed software.

Renewals are trouble-free!

There's no need to worry about renewals. **Your subscription is automatically renewed** unless you suspend or terminate it.

On-demand suspensions!

Going away on holiday or a long trip? There's no need to pay for the service if you're not using it. Suspend your subscription for 1, 2, or 3 months. When the selected suspension period ends, the subscription will be renewed automatically.

Pay at your convenience!

- Daily service charge
- Pay only for the actual number of connections.
- In the Subscription Control Center, you can generate invoices to pay for the service or use online payment systems*.
- Hard copies of accounting records can be obtained from the service provider.

Upgrade or downgrade your subscription package — with one click!

You can switch from one subscription package to another. The new subscription package starts immediately.

Terminate your subscription, if necessary

You can terminate your subscription at any time. If you resubscribe, the installer download link will become available again in your personal account area.

You are in charge of your Dr.Web protection

The Subscription Control Center provides various reports about the actions Dr.Web has performed on your protected devices — this makes the protection completely transparent to the user.

Advantageous tariffs
For home

Dr.Web Premium
The best Dr.Web subscription package for active Internet users

Maximum freedom on the web without security restrictions
